### Frequently Asked Questions

- Do you waste time standing around waiting for floor finish to dry?
- Are customers constantly walking on your wet finish?
- Can you apply 6 coats of finish in an hour with your current finish?
- Do you want to save significant time and labor cost on your floor care program?

- ✓ Show end-users how fast patient rooms can be turned around.
- ✓ Can accept immediate airflow to accelerate dry time.
- ✓ Demonstrate this finish to see if the end-users notice the low odor.

# BETCO EXPRESS®

with **SRT™**  
SCUFF RESISTANT  
TECHNOLOGY

## The Worlds Fastest Drying Floor Finish with Max-Cure™ Technology

- **Fast Drying/Fast Curing** - Up to six coats in one hour
- **Superior Black Heel Mark Resistance** - Cleaner floors
- **Extremely Low Odor** - Can be applied in occupied areas

# BETCO EXPRESS<sup>®</sup>

Betco Express<sup>®</sup> with SRT<sup>™</sup> is a **fast drying, fast curing, and extremely low odor** floor finish with **superior black heel mark resistance**. Betco Express with SRT is formulated with Max-Cure<sup>™</sup> Technology that utilizes a highly durable, internally cross-linked polymer specially blended to minimize dry and cure times. This labor savings, one of a kind floor finish can be re-coated in as little as 10-15 minutes allowing up to six coats in an hour.

## Fast Drying

- Each coat of Betco Express with SRT can dry in as little as 10 to 15 minutes.
- Fast drying and curing means up to six coats can be applied in one hour.

## Fast Curing with Max Cure Technology

- Curing is the point at which the finish develops its properties allowing additional coats to be applied without causing hazing, streaking or an uneven appearance.

## Low Odor

- Can be used in occupied areas.
- Little to no disruption to customers and staff.

## Scuff Resistant Technology<sup>™</sup>

- Drastically reduce black heel marks without affecting slip resistance.
- Innovative technology that is exclusive to Betco Corporation<sup>®</sup>.

## Safety

- Betco Express with SRT exceeds ASTM D 2047 and therefore is considered to be slip resistant.
- ASTM D 2047 is the most recognized test method for slip resistance in the courts of law.
